INTEGRATED HEALTH DELIVERY NETWORK

We believe the coordination of care through an integrated network results in better healthcare with lower overall costs and reduced healthcare disparities.

Our network of hospitals and healthcare providers share in a belief of:

- eliminating over-utilization
- utilization of best practice care guidelines in the treatment of chronic and acute disease states
- incorporation of disease management and wellness programs
- combined disease management and case management practices including transitional care programs, in-home assessments, complex case management and health coaches

Our members choose a Primary Care Physician (PCP) within a hospital network. The network's PCP becomes the member's "home" for primary care and access to specialty care and other healthcare providers.

For a hospital system and its affiliated healthcare providers to participate in our integrated health delivery network, the providers must agree to a "best in market" fee schedule. This provision ensures members are receiving the best quality of care at the most advantageous price.

ADVANTAGE is contracted with over 45 hospitals, 1,600 PCP's and 3,300 specialty physicians.

Our goal is to provide a seamless, fully integrated and cost effective health benefit plan for you and your employees.

CARE-ADVANTAGE

Care-ADVANTAGE is a program developed by us to help our members deal with long-term health problems; often called "chronic" conditions or illnesses.

Care-ADVANTAGE addresses the following health problems:

- Asthma
- Coronary Artery Disease (CAD)
- Congestive Heart Failure (CHF)
- Diabetes or high blood sugar
- Hypertension or high blood pressure
- Migraine Headaches
- Chronic Obstructive Pulmonary Disease (COPD)

Benefits of Care-ADVANTAGE:

- Access to Disease Management Educator or Care Manager
- Case Management services
- Disease Management services
- Behavioral Health coordination
- Members may be eligible for reduced prescription co-payments, through the ADVANTAGE prescription mail order program, on medications they take for their chronic health problem(s)
