

A Chiropractic Network

Available Subscribers enrolled through

ADVANTAGE Health Solutions, Inc.sm

Your employer has selected the Chiropractic Benefit coverage. Following is a directory of the providers available to you through the HSM network. In order to receive covered chiropractic services, you must utilize a participating HSM provider listed in this directory. This Chiropractic Provider Directory is current as of the date shown on the front cover. While it is our intention to continue to make available the providers listed in this directory, we can not guarantee each provider is still participating with the HSM network or accepting new patients.

Your Chiropractic Benefit ID card can be found in the same envelope as your medical ID card. Be sure to present your Chiropractic Benefit ID card during your appointment for chiropractic services. If you have any questions please contact our Member Services Department at 800-553-8933.

ADVANTAGE Health Solutions, Inc

Chiropractic Services Rider

Specialist (SCP) copay per visit applies; 20 visit limit **per calendar year** assuming medical criteria has been met. (Except Plans 100 - 109 have \$20 office visit Copay.)

Not limited to subluxation only, but subject to medical necessity

Coverage is for medically necessary care in the treatment of acute musculoskeletal conditions only.

- Services must be pre-certed following the third visit.
- Investigation, maintenance, and supportive care are not covered.
- Supports and appliances, when clinically appropriate, are covered to a maximum benefit of \$50 per calendar year.
- X-rays, when clinically appropriate, are covered to a maximum benefit per member of \$300 per calendar year.

Definitions:

Medically Necessary is defined as health care services that are appropriate, in terms of type, frequency, level, setting and duration, to the enrollee's diagnosis or condition, and diagnostic testing and preventive services. (MN Rule 4685.0100 subpart 9b)

Acute is defined as symptoms of less than six weeks duration. (McKesson Health Solutions 2005 Interqual Outpatient Rehabilitation & Chiropractic Criteria)

Musculoskeletal pain is defined as pain that affects the muscles, ligaments and tendons, along with the bones.

Maintenance Care is defined as elective healthcare that is typically long-term, by definition not therapeutically necessary but is provided at preferably regular intervals to prevent disease, prolong life, promote health and enhance quality of life. This care may be provided after a maximum therapeutic improvement, without a trial of withdrawal of treatment, to prevent symptomatic deterioration or it may be initiated with patients without symptoms in order to promote health and to prevent future problems. (American Chiropractic Association)

Supportive Care is defined as treatment/care for patients having reached maximum therapeutic benefit, in whom periodic trials of therapeutic withdrawal fail to sustain previous therapeutic gains that would otherwise progressively deteriorate. Supportive care follows appropriate application of active and passive care including lifestyle modifications. It is appropriate when rehabilitative and/or fractional restorative and alternative care options, including home-based self-care and lifestyle modifications, have been considered and attempted. Supportive care may be inappropriate when it interferes with other appropriate primary care, or when the risk of supportive care outweighs its benefits, i.e. physician dependence, somatization, illness behavior, or secondary gain. (Guidelines for Chiropractic Quality Assurance and Practice Parameters, 1993)
